Project Description Document: <https://github.com/MeetingsAndAttendance-iOS/MnA-iOS/tree/master/01-Projects-Documents>

Document Purpose:

- Give an overview of the project – what it is all about and how it works
 - Includes the types of user, inputs, outputs, functionalities, and goal
- Keep track of the revisions made in this documentation

Target Audience:

- Client (Rommel Feria)
- CS 191 classmates

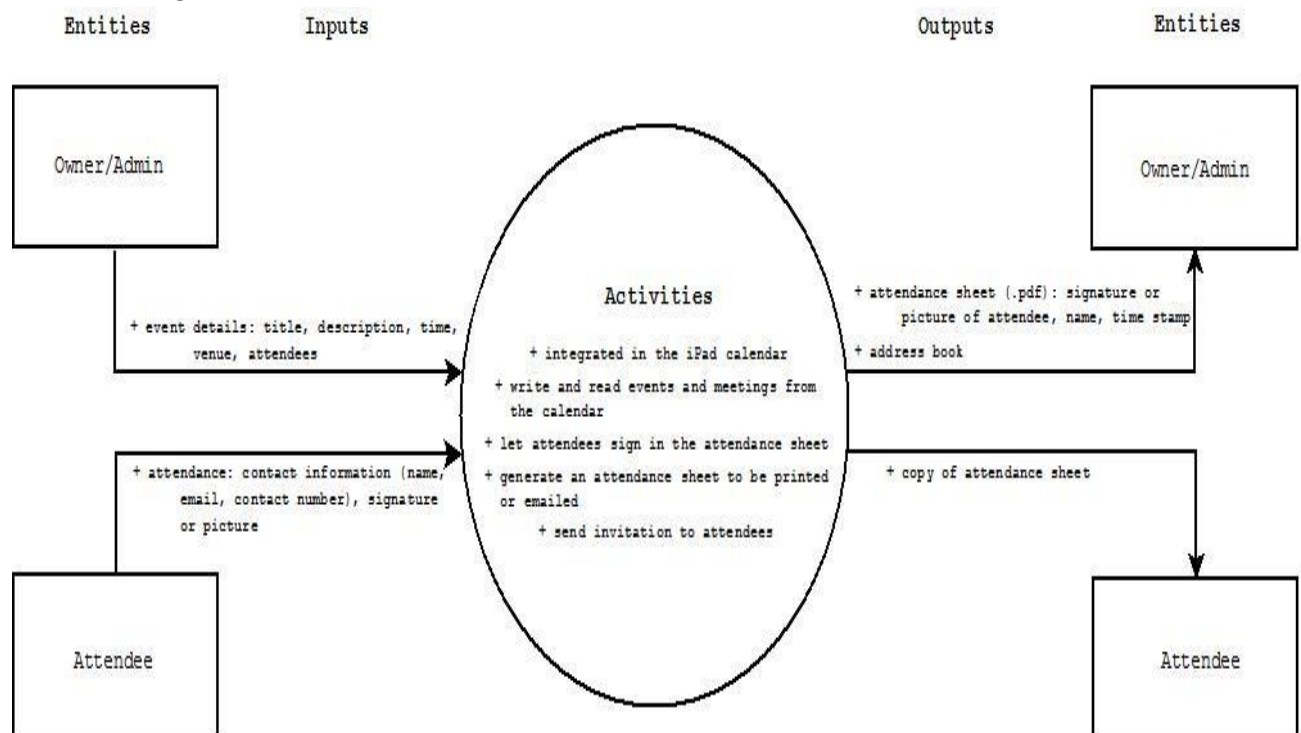

Revision Control:

<i>Revision Date</i>	<i>Person Responsible</i>	<i>Version Number</i>	<i>Modification</i>
08/26/2015	Balderas, Justin Diño, Ma. Angelica Dominguiano, Patrick Joy	1.0	Initial Document.

Project Title: Meetings and Attendance - iOS

Description: A standalone application which writes and reads events and meetings integrated in the iPad calendar. This consists of two types of user – owner or administrator, and attendee. The first type of user loads in the event details. The attendee, on the other hand, inputs his contact information and signature or picture, and can request a copy of the attendance sheet. This attendance sheet, generated as a pdf file, is either printed or emailed by the owner. For upcoming meetings and events, an invitation is also sent to the attendees which are stored in the address book of the iPad.

Context Diagram:

Entities:

- Owner/Administrator: First type of user who uploads the event and its details.
- Attendee: Second type of user, specifically “possible attendee”, who inputs his contact information, and can request a copy of the attendance sheet.

Major Inputs:

- Event details: title, description, time, venue, attendees
- Attendance: contact information (name, email, contact number), signature or picture

Major Outputs:

- Attendance sheet(pdf): signature or picture of attendee, name, time stamp
- Address book: Contact information of all the attendee user type.
- Copy of attendance sheet: A list of all the attendees; An attendee can request for this.

Major Functionalities:

- Integrated in the iPad calendar
- Write and read events and meetings from the calendar
- Let attendees sign in the attendance sheet
- Generate an attendance sheet to be printed or emailed
- Send invitation to attendees
